Mr. Tim Neal
Advanced Construction Products, LLC
P.O. Box 1010
150 Holly Hill Road
Twin Lakes, WI 53181

Dear Mr. Neal:

Thank you for your March 2 letter requesting an interpretation of Part 6 of the Manual on Uniform Traffic Control Devices concerning the Multicade device manufactured by your firm. We apologize for the delay in replying to your letter.

We have reviewed the drawings and product literature for the Multicade device and concluded that the Multicade device does not meet the established criteria for any of the devices described in Section 6F.58 through 6F.71. They are, however, acceptable as an "Other Channelizing Device," as described in Section 6F.67. Therefore the Multicade device may be used in special situations justified by an engineering study.

We hope this information is helpful to you. Please feel free to contact Mr. Ken Wood at 708-283-4340 if you have any further questions concerning this device.

Sincerely yours,

Regina S. McElroy
Director, Office of Transportation
Operations
